Shot Dialing Log

Print this, keep it by your machine, and log every shot until it's dialed in.

How to use this log

Log every shot while dialing in. Change one thing per row (usually grind). Circle or star the row that tastes best — that's your recipe. Score: 1-5, 5 = cafe-worthy.

[illegible]

Tip: print a stack and keep them by your machine. Patterns show up fast — you'll see your grind setting drift finer as beans age.
